

Cutters

Warranty - Material

Hubbell Power Systems, Inc. warrants all products sold by it to be merchantable (as such term is defined in the Uniform Commercial Code) and to be free from defects in material and workmanship. Buyer must notify the Company promptly of any claim under this warranty. The Buyer's exclusive remedy for breach of this warranty shall be the repair or replacement, F.O.B. factory, at the Company's option, of any product defective under the warranty which is returned to the Company within one year from the date of shipment. NO OTHER WARRANTY, WHETHER EXPRESS OR ARISING BY OPERATION OF LAW, COURSE OF DEALING, USAGE OF TRADE OR OTHERWISE IMPLIED, SHALL EXIST IN CONNECTION WITH THE COMPANY'S PRODUCTS OR ANY SALE OR USE THEREOF. The Company shall in no event be liable for any loss of profits or any consequential or special damages incurred by Buyer. The Company's warranty shall run only to the first Buyer of a product from the Company, from the Company's distributor, or from an original equipment manufacturer reselling the Company's product, and is non-assignable and non-transferable and shall be of no force and effect if asserted by any person other than such first Buyer. This warranty applies only to the use of the product as intended by Seller and does not cover any misapplication or misuse of said product.

Warranty - Application

Hubbell Power Systems, Inc. does not warrant the accuracy of and results from product or system performance recommendations resulting from any engineering analysis or study. This applies regardless of whether a charge is made for the recommendation, or if it is provided free of charge.

Responsibility for selection of the proper product or application rests solely with the purchaser. In the event of errors or inaccuracies determined to be caused by Hubbell Power Systems, Inc., its liability will be limited to the re-performance of any such analysis or study.

NOTE: Because Hubbell has a policy of continuous product improvement, we reserve the right to change design and specifications without notice.

Ratchet Cable Cutters for ACSR or Aluminum & Copper

Easier Operation

High-performance design incorporates Delrin plastic rollers and a two-piece operating rod. Roller mechanism travels smoothly along main Epoxiglas® pole. Linked through the roller support unit, the hinged operating rod and larger Epoxiglas pole reinforce each other.

These Ratchet Cable Cutters meet OSHA Electrical Rating subpart V-section 1926.951 (d).

Insulated support pole is Chance orange 1½"-diameter Epoxiglas with Plastisol butt cap, operating shaft is ¾"-diameter solid fiberglass rod, and lever handle is 1"-diameter Epoxiglas with rubber cushion grip.

Integral hanger hook on end casting keeps tool handy on the job site.

Four standard models offer practical 6-foot or 8-foot lengths fitted with choice of cutter heads for soft wire or ACSR. Shear-type steel blades cut without deforming cable. Heads are interchangeable for field changeouts.

Soft-Wire Head cuts cable of Aluminum through 1000 kcmil bare (1.152") or jacketed URD (2.125") and Copper through 500 kcmil (0.813").

Head for ACSR cuts 54/7 multiple-strand ACSR cable through 556 kcmil (1").

Spare cutter heads may be ordered separately below.

Improved Soft Wire jaws cut larger URD cables.

Ratchet Cable Cutters

Catalog Number	Description		Weight
	Length	Head	
C4031381	6 ft.	1000 kcmil A.A. 500 kcmil Cu.	11 lb./4.95 kg.
C4031382	6 ft.	556 kcmil ACSR	11 lb./4.95 kg.
C4031383	8 ft.	1000 kcmil A.A. 500 kcmil Cu.	11½ lb./5.18 kg.
C4031384	8 ft.	556 kcmil ACSR	11½ lb./5.18 kg.

Cutter Heads Only

Catalog Number	Head Description	Weight
P4031387P	1000 kcmil A.A. 500 kcmil Cu.	2¼ lb./1 kg.
P4031388P	556 kcmil ACSR	2¼ lb./1 kg.

CONDUCTOR CUTTERS

with Insulated Handles

for ACSR or Aluminum & Copper

CHANCE[®]

2153

Three standard models offer choice of insulated long or short handles on cutters for soft wire and insulated long handles on cutters for ACSR. Chance orange 1½" dia. Epoxi-glas[®] handles have black rubber cushion grips.

Shear-type blades cut without deforming cable. These heat-treated tool-steel cutter heads are the same as those for Chance Ratchet Cable Cutters and may be interchanged in the field. Order replacement or spare cutter heads as separate items, below. **Note:** ACSR head is not for use with 15½"

handles. Soft-wire head must not be used to cut ACSR as it will damage the cutting edges.

Storage bags to fit the short or long cutters come in heavy-duty yellow vinyl-impregnated nylon cloth. Order as separate items, below.

NOTE: These cutters are designed for energized applications, but users must wear rubber gloves and observe all applicable working clearances when cutting energized conductors.

For Soft Wire ▶
(Available with Long or Short Handles)

For ACSR Wire ▶
(Available with Long Handles only)

Conductor Cutters with Insulated Handles

Catalog Number	Length		Maximum Size & Type Conductor	Weight	
	Handles	Overall		lb.	kg.
C4031421	15½"	21½"	600 MCM A.A./350 MCM Cu.	4½	2

*Rating for P4031387 Head on 28½" Cutter handles. Used on 15½" Cutter handles, rating for P403-1387 Head is 600 MCM A.A./350 MCM Cu. **Do not use to cut ACSR.**

†Rating for P4031388 Head on 28½" Cutter handles. **P4031388 Head is not for use on 15½" Cutter handles to cut ACSR.**

CHANCE® Ratcheting Cable Cutters for ACSR or Aluminum & Copper

U.S. Patent No. 4,899,445

Compact size gets into close quarters

These patented conductor cutters are half the size and weight of standard ratchet cutters. Two styles of the compact cutters ratings match a wide range of overhead and underground conductors. They can get into such confining workspace as manholes and handholes. In practice, they open in less than half the space required for long-handled ratcheting cutters. Their small size also saves on toolbox and warehouse storage.

Single lever allows easy switching of direction.

For rapid opening or closing, pushing thumb slide toward head allows handles to open wider. Not for use when cutting, this feature nearly doubles the speed of the "soft" cutters makes the "hard" cutters open and close about three times faster than normal. For shorter, more powerful strokes while cutting conductor, release thumb slide.

Hard Style C4032980
for ACSR up to 556 max.
and Aluminum or Copper
up to 750 kcmil max.

Max. opening: 2" (5.08 cm)
Length: 18" (45.72 mm)
Weight: 4 $\frac{3}{8}$ lb. (2 kg.)

556 ACSR
(aluminum conductor, steel reinforced)

750 kcmil URD cable

Soft Style C4032979
for only All-Aluminum or
Copper up to 1000 kcmil
maximum

Max. opening: 2 $\frac{1}{4}$ " (5.72 cm)
Length: 19 $\frac{1}{2}$ " (49.53 mm)
Weight: 4 $\frac{1}{4}$ lb. (1.9 kg.)

1000 kcmil URD cable

Easy operation, rugged construction

To give long service life, the design of these compact cutters is based on a simple ratchet mechanism. Simple controls and sure ratcheting action makes working with them easy.

C-type jaws are heat-treated for lasting strength and sharpness. Stampings on the jaws indicate application limits.

Despite their small size, they are built to take punishing field conditions. The reinforced-fiberglass handles are PVC-coated and protected by a vinyl sleeve. Thick vinyl grips shield the handle ends and help worker keep a steady grasp.

Operating instructions are included with both cutter styles.

WARNING

These cutters are not insulated hot line tools.

Ordering Information

Catalog No.	Description	Weight
C4032979	Soft Conductor Cutters	4 $\frac{1}{4}$ lb. (1.9 kg.)
C4032980	Hard Conductor Cutters	4 $\frac{3}{8}$ lb. (2 kg.)

Insulated Hydraulic Cable Cutters

CHANCE[®]

2155

with guillotine-type jaw head
for #6 Solid Copper (0.162" dia.) to 954 kcmil ACSR (1.16" dia.)

Easy operation, powerful construction

A single lineworker can easily cut large-gauge conductors with the power-assist of this tool's closed hydraulic system. It operates like a hydraulic jack, by simply pumping the handle.

Epoxiglas[®] pole, handle and hydraulic hose have been tested to 100kV per foot. Hydraulic oil has dielectric strength of more than 25kV per ASTM D877. Hose has minimum burst strength of 12,000 psi. Pump provides 9,000 psi maximum pressure.

Maintenance and operating instructions are included with each tool.

Hook-style jaw hangs on conductor to help position tool. Guillotine-type blades result in smooth, clean cuts.

Ordering Information

Catalog No.	Description	Weight
C4032861	6-ft. Hydraulic Cutters	18¼ lb. (8.2 kg.)
C4032862	8-ft. Hydraulic Cutters	19¼ lb. (8.7 kg.)

Hydraulic ram fully retracts in the Open position. For efficient cutting, upper and lower jaw edges are sharpened.

Single control knob selects direction. Notice: When storing tool, be sure to relieve hydraulic pressure by turning knob to the Open position.

ALUMINUM WIRE CUTTER

These wire cutters have a heat treated steel cutter head especially designed to cut all aluminum conductors. The aluminum head and Chance Epoxiglas® handles combine to make an insulated lightweight tool for easy handling. A lineman's preference for cutting aluminum jumper cables, conductors or tie wires. Do not use this tool to cut ACSR conductors.

Catalog No.	Description	Pole Size Dia.	Conductor Ranges	Length	Weight
C4030689	All-Aluminum	1½"	1.033.5MCM	6'	8½ lb./3.8 kg.
C4030690	Wire Cutters	1½"	1.033.5MCM	8'	10 lb./4.5 kg.

HYDRAULICALLY OPERATED CONDUCTOR CUTTER

This tool is used to cut conductors up to 954 MCM ACSR, All-Aluminum and 500 MCM copper. Operation is similar to that of a hydraulic jack; a knob-handle is turned to enable the lineman to operate the pump handle. When the cut is completed, the knob is turned in the opposite direction to allow the cutting head to open.

The Epoxiglas pole, handle and hydraulic hose have been tested to 100 kV per foot. Hydraulic oil has a dielectric strength of 25 + kV per ASTM D877-64. The hose has a minimum burst strength of 12,000 PSI. The pump provides a maximum pressure of 9,000 PSI.

Features include jaws designed to cut without flattening the conductor. The jaws are also adjustable to compensate for wear. The hydraulic hose is located outside the pole for easy maintenance. It is extremely well balanced, requiring minimum effort to cut large conductors.

Catalog No.	Length	Pole Dia.	Range	Weight
C4030731	6'	1¼"	To 954 MCM ACSR	13 lb./5.9 kg.
C4030732	8'	1¼"	To 954 MCM ACSR	15 lb./6.8 kg.

LEVER TYPE WIRE CUTTERS

Three different cutter heads are available for linemen to use for cutting jumper wires, live conductors and tie wires. All cutters are assembled and mounted on Chance Epoxiglas®

insulated poles. A solid fiberglass-reinforced operating rod insulates the linemen from the cutter head. The lever handle is coated with plastisol.

The lever action gives the linemen added mechanical force to make clean cuts up to the maximum sizes shown in the table below.

H18736
Medium Duty Cutter

Catalog No.	Duty	Pole Size & Overall Length	Maximum Conductor Recommended	Weight
H18716	Light	1¼" x 6'6"	2/0 Solid Copper or 1/0 ACSR	6¾ lb./3.0 kg.
H18736	Medium	1½ x 6'7"	4/0 Stranded Copper or 4/0 ACSR	9¾ lb./4.4 kg.
T4030687	Medium	1½ x 8'7"		10¼ lb./4.6 kg.

H18716
Light Duty Cutter

INSULATED HANDLES

Chance Epoxiglas® 1¼" diameter handles may be easily attached to wire cutters or other hand tools for use in hot line maintenance or emergency repair work.

Catalog No.	Description	Overall Length	Weight
H18612	Handles Only	4'3½"	4½ lb./2.0 kg.

Chance Tree Trimmers are designed to cut up to 1½" dia. branches and are especially useful around energized conductors or in hard to get places. The Tree Trimmer head features sharpened stationary and movable blades made of drop-forged steel. The rope and pulley arrangement gives the operator a mechanical advantage of 3 to 1. For example, a 10-lb. pull on the rope will exert a 30-lb. force on the cutter head lever. Ball bearing pulleys are employed for free operation.

The rope furnished with each basic tree trimmer is 25' long; which will accommodate a 6' extension on the basic tool. The 18" long Universal Tool Fitting is provided with 25' of rope.

A Universal Pruning Saw can be added to the universal fitting on the side of the head mount.

Splices telescope snugly and fasten securely to the splice fitting on the tool. Leaf spring button lock.

Splices telescope snugly and fasten securely to the splice fittings on the tool. Leaf-spring button lock, shown, is used on the Epoxiglas® models.
